DREXEL METALS: SINCE 1985

From our beginnings over 40 years ago, Drexel Metals has built its reputation on a simple idea: when our customers succeed, so do we. That commitment to true partnerships shapes everything we do, from product development and technical design to fabrication and long-term warranty support.

Your needs are unique. Whether the scope is large or small, straightforward or complex, our proven process starts with listening to your goals, requirements, and vision. From there, our technical specialists consult, collaborate, and solve challenges — guiding you through every stage of your project.

We support contractors, fabricators, and installers with the solutions, expertise, testing, tools, and resources that help them compete with confidence in today's building industry.

A legacy of customer-focused growth:

- 1985** Drexel Metals was founded and grew into a leading distributor of painted metal for roofing, wall, architectural sheet metal, military, and crop storage applications.
- 2011** Acquired custom fabricator Met-Fab Manufacturing, expanding our capabilities with expertly crafted products and profiles.
- 2017** Joined Carlisle Construction Materials, bringing greater resources and support to our customers.
- 2024** United with other well-established metal brands under Carlisle Architectural Metals (CAM), creating the industry's most comprehensive portfolio of building envelope solutions.

ARCHITECTS AND DESIGNERS

Drexel Metals recognizes that continuing education is crucial to advancing and improving the industry. CCM University offers on-demand e-learning courses that are approved for AIA and IIBEC accreditation and can be taken by industry professionals looking for continuing education opportunities. CCM University has courses to fit your learning preference, including lunch & learn programs, e-learning courses, and webinars with live Q&A sessions. Visit DrexelMetals.com for more information.

STANDARD COLOR CHART

FINISH WARRANTY

Drexel Metals offers a 35-year finish warranty against fading and chipping, plus a coastal finish warranty against saltwater exposure for aluminum only. In 2012, Drexel Metals introduced our Gold Standard paint warranty to our network of qualified manufacturers and installers. This industry-leading warranty encompasses the total Drexel Metals system from the roof deck up and covers both materials and replacement labor if the installed Drexel Metals painted product were ever to fail. Our warranty is transferable from owner to owner, making it one of the best in the industry. An optional weathertightness warranty is also offered.

THE SUSTAINABLE CHOICE

Drexel Metals is committed to improving our planet's long-term health and well-being. We eagerly embrace the development of energy-saving solutions. Drexel Metals' products are energy-efficient and durable, making them an excellent choice for a wide variety of buildings and locations. The majority of our finishes are Cool Roof Rated, helping buildings achieve energy efficiency. In hotter climates, lighter colors re-emit up to 90% of solar radiation, reducing a building's cooling costs. In colder climates, dark colors harness the sun's rays to reduce heating costs. Drexel Metals' panels can be fabricated on the jobsite using portable roll forming machines, resulting in a significantly lower carbon footprint, reduced transportation costs, less inventory, and lower overall customer cost. Our metal panels are made from up to 90 percent recycled content and are 100 percent recyclable at the end of their 40 - 60-year useful life.

Contributions to LEED® Credits Include:

- Heat Island Effect - Solar Reflectance
- Optimize Energy Performance
- Building Reuse
- Construction Waste Management
- Material Reuse
- Recycled Content
- On-Site Renewable Energy
- Innovation
- Water-Efficient Landscaping (Rain Harvesting)

WOOD GRAIN COLOR CHART

TIMBER SERIES

With Drexel Metals’ timber visuals, you will discover the timeless charm of wood fused with the unwavering durability of metal. Virtually indistinguishable from authentic wood, these patterns empower architects and designers with boundless creative possibilities on surfaces that excel in functionality.

These timber finishes utilize a 4-coat PVDF finish system, qualifying them for a 40-year Print Coat System Limited Warranty. To ensure a smooth integration with your project’s needs, the Timber Series is offered in a variety of substrates and coil widths. Panels are offered in 24-gauge steel and .032" aluminum. Suitable for all Drexel Metals wall and soffit panels, Timber Series coils can be obtained in coil widths up to 48". For further inquiries, contact your Drexel Metals representative.

DREXEL FACADE® HL AND DMC 123/164 WALL PANELS

Color: Charcoal
Profile: Facade BR-1 and 450SL
Material: 24 gauge steel
Photo: Stacey Crescitelli Photography

PRODUCT FEATURES

- Fastener flange or clip installation for expansion/contraction
- Multiple rib patterns provide a variety of looks and design options
- Panel depth of 1 3/8" on Facade panels and 7/8" on DMC 123/164 panels
- Horizontal or vertical installation
- Minimum panel length is 4'
- Maximum panel length of 30' for steel and 22' for aluminum using through fastened system
- Longer panel lengths available with clip systems

COLOR OPTIONS

- Over 50 available finishes
- Drexlume (acrylic coated Galvalume)
- Custom options available

TESTING

- ASTM E330
- ASTM E283
- ASTM E331
- AAMA 501.1-05-B1, B2, C2, S1
- ASTM 1592
- ICC-ES ESR-5838

AVAILABLE IN TWO FASTENING OPTIONS

CLIP FLANGE

FASTENER FLANGE

Facade HL aluminum panels more than 22' or steel panels more than 30' should utilize the clip system. Facade HL panels are NOT designed to be field-lapped. Transition trim between panel ends is needed for longer runs. Contact your Drexel Metals representative for longer length options.

DREXEL FACADE BR WALL PANELS

The Facade BR architectural series boasts a sleek and modern design that will elevate the aesthetic of any building. These panels feature 87-degree rib angles, as well as a variety of rib spacing patterns. Our Facade BR wall panels are available in a vast range of colors and finishes, allowing you to perfectly complement the appearance of your building.

The Facade BR profiles are $1\frac{3}{8}$ " deep and a nominal 12" wide. All Facade Series profiles, including Facade BR, Facade HL and the $\frac{7}{8}$ " deep DMC 123/164, can be intermixed to add unique visuals to a building's exterior. Facade Series wall panels can be installed horizontally or vertically. Consult your Drexel Metals representative for maximum length; minimum panel length is 4'.

Additionally, Aluminum Facade Series wall panels can be perforated for use as equipment screens and architectural details.

PRODUCT FEATURES

- Multiple fastening options available for expansion/contraction
- Panel depth $1\frac{3}{8}$ " nominal
- Panel width of 12" nominal
- Horizontal or vertical orientation

PERFORATED METAL

Drexel Metals offers perforation of select metal wall panels and flat sheets. Perforated panels and metal can provide a contrasting look with any non-perforated metal to create visual interest on any project. Architects can specify perforated aluminum and copper to diffuse light, air or sound, or simply for architectural flair. Typical applications include equipment screens, partitions, sign panels, parking decks, guards, interior acoustical applications and enclosures of any kind.

Perforation is available in a nearly endless combination of hole sizes, spacing and open space percentages to complement virtually any architectural design or need. Perforation options will vary by panel profile and metal thickness; consult your Drexel Metals representative for details.

THE MOST POPULAR EXAMPLES ARE SHOWN BELOW. ADDITIONAL OPTIONS ARE AVAILABLE.

Consult your Drexel Metals representative for additional pattern options not shown on the above chart.

Notes: Extra charges are applied for perforation | Steel will not be perforated | Limitations might apply for certain perforation specs; check with your Drexel Metals representative for details and options.

FLUSH AND REVEAL WALL PANELS

Flush and Reveal panels are designed for wall, fascia and soffit applications where a flat appearance is desired. A rounded interlock leg and concealed fastening system improves the flush appearance while providing additional strength.

Flush and reveal panels are available in on-center dimensions designed to complement Drexel Metals' roofing panel product line.

PANEL RIBS

The FWQ100 panel profile is available with multiple panel rib options. Panel ribs are recommended for longer panel lengths to help reduce some effects of oil canning.

INSTALLATION

FWQ100 panels shall be installed over a solid substrate with appropriate underlayment, or in limited applications over framing sections. When used in a windscreen application, panels must be fastened (stitched) through side joints. Consult a local architect/engineer for requirements of local codes and conditions.

TRIM

All flashing and trim shall be fabricated by Drexel Metals or an authorized fabricator. Flashing shall be Drexel Metals aluminum or Drexel Metals steel. A 35-year non-prorated finish warranty can be supplied covering finish performance. Minimum bending radius is 2T. Vinyl masking is recommended on all fabrication applications where extra handling is expected. NOTE: The strippable vinyl film must be removed immediately after installation.

HORIZONTAL APPLICATIONS

When installing Flush and Reveal panels horizontally, install the first panel at the top of the wall and proceed to the bottom.

OIL CANNING

Jobsite factors such as temperature variation, unlevel substrate and/or improper installation may promote oil canning. Oil canning does not affect panel finish or structural integrity and therefore is not cause for rejection. To help minimize the visual appearance of oil canning, recommended maximum panel lengths are listed. An oil canning acknowledgment form is required for FWQ100 and Board and Batten orders exceeding the recommended panel lengths.

Color: Champagne
Profile: FWQ100 - Flush
Material: 24 gauge steel

BOARD AND BATTEN WALL PANELS

Board and Batten panels have the unique ability to seamlessly blend into various architectural settings. Whether you are seeking a cozy and inviting facade or a bold and striking statement, Board and Batten exterior walls remain a durable and versatile canvas for architectural creativity.

PRODUCT FEATURES

- ¾" batten depth and 2" width
- Alternating wide boards and narrower elevated battens
- Pre-punched mechanical fastening slots
- Vertical installation is required for wall applications
- Maximum recommended panel lengths:
 - 8'-0" nominal for 24 gauge steel and .032" aluminum
- Maximum panel length of 30' for steel and 22' for aluminum

EXPOSED FASTENER PANELS

Color: Deep Blue Sea*
Profile: ½" Corrugated

Drexel Metals offers a full line of exposed fastener panels with matchmaking screws and rivets, allowing for unobstructed chromatic design in a cost-effective yet architecturally attractive metal panel. The versatile 7.2 panel, R-36 and ⅞" Corrugated panels can be specified for a wide range of building envelope applications including roofs, walls and linear panels. The M-36, M-42 and ½" Corrugated panels are suitable for wall and equipment screen projects.

TRIM

All flashing and trim shall be fabricated by Drexel Metals or an authorized fabricator. Flashing shall be Drexel Metals aluminum (.032 - .063 gauge as specified) or Drexel Metals steel (24 gauge or 22 gauge as specified). A 35-year non-prorated finish warranty can be supplied covering finish performance. Minimum bending radius is 2T; consult your Drexel Metals representative for details.

Vinyl masking is recommended on all fabrication applications where extra handling is expected. NOTE: The strippable vinyl film must be removed immediately after installation.

PRODUCT FEATURES

- 35-year non-prorated finish warranty
- Matching screws and rivets
- Closure strips available
- Precut short lengths (5'-0" minimum) (3'-0" on the M-42)
- Maximum panel length of 30' for steel and 22' for aluminum

DEFEND-R® CI WALL INSULATION

From expertly formed metal panels to profile-specific clips and screws, Drexel Metals offers a complete system. Rounding out the system is our line of wall insulation products. Drexel Metals' Defend-R CI line consists of rigid wall insulation panels composed of a closed-cell polyisocyanurate foam core manufactured to various facer types in both standard and Class A variants.

COMMITMENT TO SUSTAINABILITY

Reduced Waste

Energy-efficient Defend-R CI polyiso is made of 9% pre-consumer recycled content and has increased R-value per inch when compared to mineral fiber, XPS, or EPS options.

Manufactured with NexGen Chemistry

- Blowing agent used has zero ozone depleting potential (ODP)
- Produced with virtually zero global warming potential (GWP)
- Manufacturing process contains no CFCs, HCFCs, or HFCs

DEFEND-R CI COATED GLASS AND COATED GLASS (CLASS A)

Insulation Manufactured On-Line to Premium Performance Coated Glass Facers

- Coated glass facer offers versatility in walls
- Can be installed directly on steel studs in a variety of wall assemblies without the need for gypsum sheathing
- Available thicknesses 1" - 4"
- R-values 6.0 - 25.0

DEFEND-R CI PLY AND PLY (CLASS A)

Insulation Bonded to Fire Treated Plywood

- Can be installed directly to steel studs or wood framing without the need for gypsum sheathing
- Optimal substrate for mechanically attaching cladding materials
- Available thicknesses 1.6" - 4.7"
- R-values 6.8 - 26.0

DEFEND-R CI FOIL AND FOIL (CLASS A)

Insulation Manufactured On-Line to Foil Facers

- Reflective foil faced material offers maximum energy efficiency/R-value
- Excels in masonry cavity wall applications
- Available thicknesses 1" - 4"
- R-values 6.5 - 27.0 (Foil)
- R-values 6.3 - 25.2 (Foil Class A)

DEFEND-R CI NAIL BASE

Insulation Bonded to OSB or Plywood

- Wood composite material designed for use in residential and Type V commercial applications
- Optimal substrate for mechanically attaching cladding materials
- Thicknesses 1.5" - 4.5", R-values 6.6-25.6 (OSB)
- Thicknesses 1.6" - 4.6", R-values 6.8-25.8 (ply)

DEFEND-R CI ACCESSORIES

Drexel Metals offers a full range of insulation accessories. These products, including air and water barriers, adhesives, fastening systems and sealants ensure you have all the components to successfully install your complete Drexel Metals wall system.

Hunter VP-SA WRB

A vapor permeable, self adhering, air and water resistive barrier.

CAV-GRIP®

Low-VOC aerosol contact adhesive

Foil Grip 1402 Tape and Aluma-Grip 701 Flashing

Indoor/outdoor reflective butyl tape for board seams/joints and butyl flashing for transition areas

ECHOtape MT A7757 All Weather Aluminum Foil Tape

An indoor/outdoor acrylic tape for board seams/joints

FlexShield

A white acrylic seam/joint tape

Thermal-Grip IFS Fastener/Gun

Insulation fastening system

SIP/WD

Mechanically attached fastener for wood studs. For use with Defend-R CI Ply, Defend-R CI Ply (Class A), Defend-R Nail Base, and Defend-R CI Nail Base. No pre-drilling required.

SIP/SD and SIP/SD-PT

Mechanically attached fastener for 18 – 22 gauge steel stud, concrete, or CMU walls. Use with Defend-R CI Ply, Defend-R CI Ply (Class A), Defend-R Nail Base, or Defend-R CI Nail Base. Used to prevent panel jacking.

SIP/HD and SIP/HD-PT

Mechanically attached fastener for 12 – 16 gauge steel stud walls. Use with Defend-R CI Ply, Defend-R CI Ply (Class A), Defend-R Nail Base, or Defend-R CI Nail Base. Used to prevent panel jacking.

TRUFAST Walls

Thermal-Grip ci Prong Washer, Thermal-Grip Brick Tie Washer, Grip-Deck ci Screw, Plasti-Grip ci Prong Washer, Plasti-Grip® PMF Anchor

BarriBond HP

Liquid flashing and detail sealant available in 20 fl oz. sausages. Apply with trowel in one coat.
